## DO YOU PULL YOUR HORSES MANE?

---

We all comb our horse's lovely locks. Some of us pull our horse's manes regularly. Some of us are OCD about manes, and pull them frequently. Some of us have pastures with burdocks in them...and almost all of us have a little metal aluminum comb in our brush boxes. It's the only really tough, rugged, perfectly designed tool to pull out snarls, too thick manes and burdocks...not to mention it's the tried and true tool for mane pulling. Do you have one without a handle? It's too small to hold onto when pulling burdocks, especially if you have a non-stick product on the hair to help. And if it does have a handle, unless it is a Horse Amour Ultimate Pulling Comb, that handle is small, slippery and will fall out under pressure. But knot anymore!

# NEW!

---

**“It’s a mighty  
stable tool with  
horsepower”**

**Suggested Retail: \$21.95**

---

**\*aluminum cast comb with 4” pressure fitted tang to  
guarantee stability**

---

**\*durable solid New England hardwood handle**

---

**\*ergonomic & attractive**

---
